Dear Sir/Madam

Want lower power bills and a comfortable, healthy home?

The Waipa Networks Trust, as your network lines company, knows that many homes in Waipa are spending much more than they need to on power. In fact many homes are wasting up to \$100 per month in power for no gain. That hurts homeowners in the pocket and places unnecessary strain on our natural resources.

So wouldn't it be great if you could reduce your power bill while making your home healthier and more comfortable?

The good news is that you can. There are lots of ways you can save power in your home without sacrificing comfort and convenience. In fact improving energy efficiency usually means making your home far more comfortable and healthy – warmer and drier in winter and cooler in summer.

In uncertain economic times smart homeowners are also looking to invest in the value of their homes by improving their energy efficiency. Homes that are efficiently heated and properly insulated are worth more and are more attractive to prospective purchasers, should you decide to sell in the future.

But we know it can be hard to know where to start, and it's difficult to find the time to even think about becoming more energy efficient.

And that's where we can help.

The Waipa Networks Trust and Energy Mad are, for a limited time, offering a limited number of Waipa homeowners the opportunity to receive a **FREE** home energy assessment (valued at \$197).

Our experienced home assessor will provide you with an easy to understand report that will tell you:

- Where your power is currently going – you might just be surprised!
- The power savings, comfort and health benefits you will enjoy by installing different types of energy saving products.
- The ideal, tailored package of products to consider – we can source products such as fires, heat pumps, heat pump water heating and insulation at competitive rates.

EcoSmartHome is one of a few providers able to offer government funding for product purchases. This means we are able to provide most homes with a 33% cash subsidy on insulation (up to \$1,300) and a \$500 subsidy on heating products. If you have a Community Services Card the subsidies available are even higher.

There's no obligation, no pressure, and plenty of useful advice to help you knock your power costs down.

If you would like to take advantage of this unique offer then give us a call on 0800 4 ECOSMART (0800 432 676) or register at www.ecosmarthome.co.nz.

Remember, the assessment is completely free, but you must register **before DATE**.

Yours sincerely

Keith Storey
